TEACHING AND RESEARCH INTERESTS

My teaching has focused on social and political aspects of the Internet and related information and communication technologies, including issues centered on the politics of shaping access in information and people in government, politics, education, and households, along with the policy implications of these issues. I've taught at under-graduate and graduate levels, and also designed and taught an online course at the doctoral level. My two major areas of focus include:

Internet Studies: Information, Communication and the Social Sciences. Developed a post-graduate curriculum for the OII at the University of Oxford, focused on doctoral and masters level training, but extending to proposals for optional under-graduate papers on Internet studies, research methods and the Internet, and Internet governance. Conceived and launched the OII's Summer Doctoral Programme, designed for advanced doctoral students from around the world. Developing a course on theoretical perspectives on the social implications of the Internet, media and information for MSU.

Media and Information Policy in the Digital Age. Developed a graduate course on media and information policy at MSU and taught courses on cross-national perspectives on communication and information technology and public policy, focusing most recently on Internet governance and regulation.

TEACHING EXPERIENCE

Internet Studies: Information Communication and the Social Sciences

Nature and Impact of Communication (USC); Communication Technology and Social Change (USC, Brunel); Social Dynamics of Communication Technology (USC); and Society and the Internet (MSU).

Media and Information Policy

Pro-Seminar in Communication Management (USC); Communication Policy (USC); Comparative Communications (USC); Communications and Governance (USC); Politics and Policy of the Internet (University of Konstanz); Media and Information Policy (MSU); Global Media and Information (MSU)

Methods of Inquiry

Learning from Case Studies in Communication (USC); Political Statistics (SUNY); Survey Research (UC Irvine and USC); Research Methods and the Internet (Oxford).
